COMPANY DEVELOPMENT

2015 - Set sail

The first production base was established, opening a new journey of professional cosmetics OEM / ODM / OBM

2020 - Take off

Huge investment in cosmetics R & D and testing of cutting-edge equipment, the establishment of cosmetics R & D laboratory, to become the industry's product development system, quality control system and product testing system of advanced model enterprises.

2017 - Gathering Momentum

Become a well-known OEM/ODM/OBM processing enterprise in the Pearl River Delta, serving many cosmetics brands, and cleaning and care brands. In order to maintain the company's core competitive advantages, it has established strategic partnerships with many cosmetics R&D institutions in the United States, Japan and South Korea.

2023 - Innovation

Establishment of the second largest production base (SEYE BIOMEDICAL) to become the first service platform for exporting innovative products with efficient production and one-stop, worry-free services, and to become one of the few companies in the industry that possesses the ability to close the entire OBM service loop of "basic research + raw material construction + branding + product production".

COMPANY INTRODUCTION

Guangzhou Seye Biomedical Technology Co.,Ltd, an advocate of precise skincare technology and a one-stop solution provider Seye Biomedical Technology Co.,Ltd was founded in the "Baiyun Meiwan" Beauty and Health Industrial Park in Guangdong, China. With precise skincare technology as its core, it is committed to providing global customers with professional OEM/ODM one-stop services for cosmetics. Relying on a modern R&D and production base with a construction area of 88,000 square meters, the company integrates the capabilities of the entire industrial chain including R&D, production, quality control and certification, and continuously empowers brand innovation and growth.

COMPANY ADVANTAGES

FIVE CORE STRENGTHS TO SAFEGUARD YOUR JOURNEY

CERTIFIED STRENGTH

It has won over 20 international authoritative certifications, including FDA, CPNP, Halal, etc., covering market access standards in multiple regions such as Europe, America, the Middle East, and the Asia-Pacific, helping customers' products to smoothly navigate the global market.

SERVICE STRENGTH

Our professional team provides customers with full-process solutions from concept to market launch, establishing product - R&D - The production tripartite collaboration mechanism enables a 2-hour response to urgent orders.

R&D STRENGTH

With three major research institutes (the Institute of Genetic Engineering, the Institute of Bioengineering, and the Institute of Formula), it holds over 108 exclusive patents and has published 147 scientific and technological papers. It has established technological barriers in fields such as supramolecular 577 and exosome applications.

PRODUCTION CAPACITY

The production base has a daily production capacity of over 1,000 tons, equipped with intelligent production lines and a flexible supply chain system, supporting bulk cargo production and urgent order response, ensuring efficient order delivery.

QUALITY CONTROL STRENGTH

Establish a full-chain quality control system, and implement medical-grade quality management standards from raw material warehousing to finished product shipment to ensure product safety, stability and compliance.

We have always adhered to the concept of "empowering skincare with technology", taking precise identification, precise evidence-based practice and precise delivery as the technical paths, to provide customers with outstanding products that are both market-competitive and technologically rich.

SEYE Senye, with a heart dedicated to scientific research, is committed to achieving the beauty of the brand.
